Ideaca Portals and Collaboration Customer Snapshot

Microsoft
GOLD CERTIFIED

Partner

GLOBAL PARTNER OF THE YEAR

Ideaca has designed portal solutions that organize unstructured data and business systems to provide searchable central point of access to business information. To maximize intellectual capital and investment, we build portals that are collaborative, extendible and efficient. Portals that make it easy for employees to find the information they need, provide the control necessary for real-time reporting and set the foundation to support future growth. Below are a few select Ideaca Portals and Collaboration customers:

Talisman Energy

Talisman Energy Inc. is an independent upstream oil and gas company headquartered in Calgary, Alberta. Talisman has operations in Canada and its subsidiaries operate in the UK, Norway, Southeast Asia, North Africa, South America and the United States.

Ideaca delivered a multinational Project Delivery System portal, leveraging Microsoft Office SharePoint Server (MOSS) 2007. The portal supports Talisman's global Project Management Discipline and provides access to best practices, acts as a central repository for project-related knowledge, and facilitates knowledge sharing and future collaboration initiatives for project teams regardless of their location

ATS Automation Tooling Systems

ATS Automation Tooling Systems Inc. (ATS) custom designs, builds and installs manufacturing solutions for many of the world's most successful companies in North America, Asia, and Europe.

ATS implemented a quality management solution based on Microsoft Office SharePoint Server (MOSS) 2007 integrated with Microsoft Office Visio 2003 to provide ISO9001 document standards and ensure compliance globally. This award winning solution has helped ATS increase organizational productivity and workforce effectiveness.

Butterfield & Robinson

Butterfield & Robinson

Butterfield and Robinson (B&R) is a luxury travel company that specializes in providing their customers with one-of-a-kind walking and biking tours. B&R's goal is to create one-of-a-kind journeys for active people who value their freedom and want to see the world a little differently.

Based on recommendations from Ideaca, B&R implemented Microsoft Office SharePoint Server (MOSS) 2007 Beta with integration to Dynamics CRM. The solution uses MOSS 2007 to store published materials, populating all trip related metadata from B&R's Travel Management database exposing it in CRM, thus allowing access to all customer information from one system.

TransCanada

TransCanada is a leader in the responsible development and reliable operation of North American energy infrastructure. TransCanada's network of approximately 41,000 kilometers (25,600 miles) of pipeline transports the majority of Western Canada's natural gas production to key Canadian and U.S. markets.

Ideaca helped TransCanada implement a SharePoint Portal Server to provide a platform for internal collaboration across corporate functions and business units. As a result, TransCanada was able to significantly improve their business processes providing useful information for their knowledge workers.
